

## Biosafety Platform & Innovation Manager

---

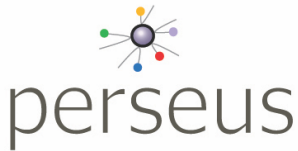

Perseus BV is a collaboration of biosafety and regulatory experts from various areas of application, with a focus on biotechnology. Depending on the needs and expectations of the individual customer, Perseus offers the necessary expertise for all aspects related to the safety of biological material such as risk assessment, risk management, analysis of applicable legislation and good practices, issue management, communication, etc. Perseus BV has a broad and extensive customer base, with large and small companies, academic institutions and governments, in various sectors, including biotechnology and pharmaceuticals, in Belgium, Europe and the rest of the world. Over the course of nearly 20 years, Perseus has acquired a unique position and built a rock-solid reputation for its expertise. For more information, please visit [www.perseus.eu](http://www.perseus.eu).

We are building a digital platform that will optimise internal operations and significantly strengthen services. Because digitisation is a dynamic process, Perseus will continue to invest in digital innovation after the implementation of the platform.

To maintain and expand that innovative drive and customer focus, we are looking for a Biosafety Platform & Innovation Manager. This person works on strategic issues related to the (further) digitisation of services and is able to identify opportunities in the market and contribute to the development of new proposals and applications.

### Tasks

- Confirm position as an innovative partner for customers Strategically transform innovative ideas and customer challenges into marketable and valuable solutions that can be scaled, including the developed digital platform
- Introduce e-learning Provide insight into the preparation of plans, presentations and overviews necessary to efficiently drive and further develop product development activities throughout the company
- Scout and monitor innovative business trends Focus on data management (single customer view, data connectivity, privacy by design, ...) and data-driven marketing (marketing automation, data onboarding, ...)
- Gain customer insight Collect information about customer needs, competition, marketing research in function of new digital possibilities
- Strategic business advice Advise on improvement and tools for processes within the organisation

## Profile

- You can think both divergently (thinking up several solutions for 1 problem) and convergently (translating ideas into concrete solutions).
- You have at least a master's degree in life sciences and you have a high affinity with digitalisation.
- You speak and write Dutch and English fluently. French is a nice-to-have.
- You like to work inter-disciplinary. You like to inspire your colleagues and be inspired by them.
- You are skilled in identifying issues and aim for pragmatic solutions.
- You are customer-oriented and have an entrepreneurial spirit.

## Offer

- Perseus is a reference in biosafety and will also be future proof with the new platform and further digital services. You will join an ambitious company with a pleasant and family working atmosphere, and where there is room for creativity and initiative.
- The Perseus team consists of driven, highly educated and enthusiastic experts with different scientific backgrounds.
- Expertise is essential! All Perseus employees are given opportunities to follow appropriate training.
- The position is full-time, but part-time (80%) and flexible working hours are negotiable.
- Your remuneration is tailored to your competencies in a stimulating way, supplemented with a number of fringe benefits.
- The tasks will be performed via homework, via interactions at the office and on site with our customers.
- This job gives the opportunity to grow further in a very dynamic company.

## Info and contact

Would you like to help draw the lines from a strategic perspective?

Mail your resume, contact details of 2 reference persons and a short letter in which you convince us that you are the ideal candidate to [jobs@perseus.eu](mailto:jobs@perseus.eu). We will contact you further.

This vacancy will remain open until a suitable candidate is found.
